

Hireon: Commercial SaaS Proposal & Infrastructure Costing

Executive Summary

This document provides the precise commercial pricing and infrastructure architecture required to run the **Hireon AI-Powered Recruitment Platform**. Designed to effortlessly handle **4,000 - 5,000 candidates per month** (primarily via bulk imports with AI parsing capabilities), this architecture is optimized for performance, self-reliance, and security.

PART 1: Premium Infrastructure & Services Breakdown

1. Cloud Compute & Self-Hosted Infrastructure

Instead of relying on fragmented managed services, we utilize a powerful centralized Virtual Private Server (VPS) to host the entire ecosystem.

- **Service:** DigitalOcean Droplet (4GB RAM, 2 vCPUs, 80GB SSD)
- **Hosted Applications:** FastAPI Backend, React Frontend, PostgreSQL (Database), Redis (Caching), Celery (Background Tasks), and Elasticsearch.
- **Monthly Cost:** \$24/month -> **Rs 2,016 INR**

2. Professional Communication & Calendar Setup

For automated interview scheduling and reliable official candidate communications.

- **Service:** Google Workspace Admin Account (1 Seat)
- **Included:** Custom domain email (admin@hireon.com), Google Meet API access, and Calendar API for automated scheduling.
- **Monthly Cost:** **Rs 605 INR**

3. AI Services & LLM APIs (Pay-As-You-Go)

Handling approximately 150 deep resume parsing and scoring operations per month, alongside Copilot chat features.

- **Services Used:** Groq API (Fast Inference), Gemini API (Complex Evaluation), and OpenAI Whisper (Audio/Interview analysis).
- **Token Volume:** Estimated usage for ~150 candidates.
- **Monthly Cost:** **~Rs 504 INR**

4. Miscellaneous (Domain, DNS & Security)

- **Services:** Cloudflare Web Application Firewall (WAF), DNS Routing, and SSL Certificates.
- **Monthly Cost:** **Included / Free Tier**

Infrastructure Subtotal: Rs 3,125 INR / month

(This covers the exact hard costs of the premium server, Google Workspace, and AI API consumption to process 5,000 candidates).

PART 2: Platform Licensing, DevOps & Managed Support

Running a centralized DigitalOcean server requires expert DevOps management (database backups, security patching, and Elasticsearch maintenance).

- Continuous Server & Database Monitoring (99.9% Uptime guarantee)

- Regular security patches, OS updates, and bug fixes

- Commercial SaaS license to use the proprietary Hireon platform

● Monthly Fee: Rs 8,875 INR

Final Client Billing Summary

Category	Monthly Cost (INR)
DigitalOcean, Google Workspace & AI APIs	Rs 3,125
DevOps, Licensing & Managed Support Fee	Rs 8,875
TOTAL MONTHLY RETAINER	Rs 12,000 INR / month

Why this Architecture?

By utilizing a powerful 4GB RAM DigitalOcean Droplet, we eliminate the need for expensive third-party database subscriptions. This self-hosted approach ensures complete data privacy for your 5,000 candidates while delivering blazing-fast performance.
